

Managed Network Detection & Response (NDR)

Without the correct tools, security operations teams are left in the dark when trying to detect attacks; 69% of IT security practitioners cite network visibility as the top reason for SOC ineffectiveness.

Network Detection and Response (NDR) solutions use non-signature-based, data analytical techniques to detect anomalous or suspicious network traffic.

Managed Network Detection and Response (NDR)

Our Managed NDR service provides customers with the capability to detect and defend against advanced threats wherever their infrastructure is situated. Our Managed NDR service provides customers with a 24/7 SOC security monitoring capability and the skills required to install and manage an NDR solution.

We have partnered with ExtraHop and their Reveal(x) 360 platform to provide the technology at the heart of our Managed NDR service. The Reveal(x) 360 platform is a SaaS platform designed to detect advanced threats, investigate incidents, and stop breaches, before they can compromise your business.

The main features of the Managed NDR service are:

- Experienced cyber security engineers and architects to design, deploy, and manage the underlying technologies and platforms.
- 24/7 SOC monitoring from our team of expert security analysts.
- Reveal(x) 360 cloud platform providing machine learning to detect attacks without the need for signatures, wherever your infrastructure is located.
- Our Managed SOAR platform which uses expertly designed playbooks designed to deliver security outcomes quickly alongside clear reporting and visibility into the decisions our team of experts are taking.

Managed Network Detection & Response

Why Talion?

Working with us has the following advantages:

- As an independent MSSP we only work with best of breed security technologies and partners.
- Our team of Solution Architects, Security Engineers and SOC Analysts provide the skills to design, deploy, and operate the Managed NDR service so you don't have to.
- We provide transparency and visibility into our managed services, enabling us to form an effective partnership essential to detecting and stopping attacks.
- We operate a defence-grade managed security service using our Threat Intelligence. We understand the threat landscape to help protect a global base of enterprise customers in the Defence, Legal, Financial Services, Technology, Construction, Energy and Social Care sectors.

About Talion

At Talion, we're changing the way organisations interact with their Managed Security Service Provider. Born out of BAE Systems, our service is built on first-hand knowledge of military engineering and defence-grade security, together with an in-depth understanding of the threat landscape facing the commercial world today.

When it comes to cyber security, we believe every organisation deserves full visibility and complete control over how threats are monitored, how decisions are made, and how their business is protected. That's why we prioritise transparency and collaboration across our service lines, implementing security programs that give businesses the control and freedom to pursue ambitions and realise goals, safe in the knowledge that we've got their back, 24 hours a day, 7 days a week.
